Node.js

SQL

Java

Python

PROFILE

I'm a Software Engineer with 6 years of experience. I'm passionate about learning and building new things.

I have extensive experience in languages such as Go, Java, and JavaScript, as well as modern frameworks such as Vue and React. My specialty is back-end development, where I seek to create robust and scalable solutions. However, I am always updating myself in front-end development, where I have worked on projects such as landing pages, CRMs, and e-commerce.

EMPLOYMENT HISTORY

Technology Agent at Banco do Brasil, São Paulo/SP

March 2024 — Current

Designed and implemented a scalable, high-performance platform for blockchain solutions using Java/Quarkus and Node.js with Express and TypeScript. Integrated OracleDB and Apache Kafka for reliable data processing and event-driven architecture. Ensured code quality and system stability through rigorous unit testing.

Back-End Developer at StudioSol, Remote

July 2022 — July 2023

Developed and maintained scalable REST and GraphQL APIs using Golang, ensuring efficient data processing and system reliability. Optimized database interactions with MySQL and improved caching performance with Memcached for enhanced application responsiveness.

Jr. FullStackDeveloper Analyst at Zipper, Remote.

October 2021 — June 2022

Designed, developed, and maintained web applications using Node.js(Nest), Vue.js, and Nuxt, leveraging GraphQL for efficient data querying. Integrated MongoDB for database management and utilized AWS services like Lambda, S3, and SQS to optimize scalability and performance.

FullStack Web Developer at Code49, Remote

October 2020 — September 2021

Developed and maintained a real estate CRM system, enhancing functionality and performance using PHP, JavaScript, jQuery, Vue.js, and MySQL. Designed efficient database structures and optimized queries to improve system responsiveness and reliability.

EDUCATION

Bachelor in Information Systems,, Universidade Estadual Paulista "Júlio de Mesquita Filho", Bauru

January 2020 — December 2025

Focused in developing the skills for administration and computing for a diversity of working places in the information systems world.

Computer Technician, CTI - Colégio Técnico Industrial "Prof. Isaac Portal Roldán" , Bauru

January 2016 — December 2018
